Fill each blank with the suitable word given in the box.

There was an air of hidden strength about him, a **graceful** strength that showed in his balance, the way he held himself, the way he walked.

Although he was on the small side, he wasn't as slight as I first thought.

He had a green army jacket tied around his waist and a green canvas bag \_\_\_\_\_ his shoulder.

The only non-green thing about him was the pair of loosely black walking boots on his feet.

As we drew closer, the figure became clearer, it was a young man, or a boy, dressed scruffy in a drab green T-shirt and baggy green trousers.

He wasn't exactly **muscular**, but he wasn't weedy-looking either.

Fill each blank with the suitable word given in the box.

Robin Hood, the legendary outlaw hero originally depicted in English folklore and subsequently featured in literature and film, is not a typical hero.

He is a **rebellious** character, who had the desire to resist authority and its harsh and inhuman control over the poor.

He is often depicted as wearing Lincoln's green and either a feathered hat or a hood.

Although Robin is a criminal, he is known to have stolen from the rich and give to the poor, which many find a **generous** act.

According to legend, he was a highly skilled archer and swordsman.

Due to his good natured and status with courtesy, he treated women, the poor, and people of humble

Full, \_\_\_\_\_ lips protruded beneath the bushy black moustache and, at their corners, sank into little folds filled with disapproval and potato chip crumbs.

In the shadow under the green visor of the cap Ignatius J. Reilly's supercillious blue and yellow eyes looked down upon the other people waiting under the clock at the D.H. Holmes department store, studying the crowd of people for signs of bad taste in dress.

Several of the outfits, Ignatius noticed, were new enough and expensive enough to be properly considered offenses against taste and decency.

A green hunting cap squeezed the top of the fleshy balloon of a head.

The green earflaps, full of large ears and uncut hair and the fine bristles that grew in the ears themselves, stuck out on either side like turn signals indicating two directions at once.

Possession of anything new or expensive only reflected a person's lack of theology and geometry; it could even cast doubts upon one's soul.

Arrange the given sentences into a well-structured paragraph by ordering them from 01 - 05 accordingly.

In consuming countries, cocoa is an important ingredient in the confectionery, and food and beverage industries, and, more recently, in the pharmaceutical and cosmetics industries.

2

Cocoa is of significant economic importance both for producing and consuming countries. For producing countries, it generates export revenues, income and employment.

1

For most of these people, cocoa constitutes the main, if not only, source of cash income.

4

Furthermore, globally, cocoa is produced by six million farmers, and contributes to the livelihoods of 40 to 50 million people (WCF, 2012).

3

In Côte d'Ivoire and Ghana, for example, this commodity accounted for more than 30 per cent of export earnings over the period 1995-2014.

question

Arrange the given sentences into a well-structured paragraph by ordering them from 01 - 05 accordingly.

The truck did not really have to pull the Space Shuttle once it overcame rolling resistance and got moving.

3

Choose... ▾

Nobody wants a runaway Space Shuttle. So, the route was planned very carefully. The best speed for the Space Shuttle to travel was determined to be only 2 miles per hour.

5

Choose... ▾

Rolling resistance is the energy that was lost from the tires on the SPMT (the Self-Propelled Modular Transporter which carried the Shuttle) as they experienced friction and gravity as they moved down the street.

2

Choose... ▾

The Space Shuttle has so much mass and is so heavy that it builds up a tremendous amount of momentum when going downhill, which makes it very difficult to stop. Momentum = mass x velocity.

4

Choose... ▾

There were two big challenges for a Toyota Tundra truck to be able to move the Space Shuttle down the street. One was controlling rolling resistance and the other one was avoiding going up and down hills.

A study (Taubert et al. 2007) into the body's response to the low consumption of cocoa found that these health benefits are comparable to those achieved through the use of conventional blood pressure medicine.

Chocolate has been shown to improve cardiovascular health. Cocoa, from which chocolate is made, contains flavonoids.

When blood pressure is lowered, there is a reduced risk of health problems such as stroke and coronary heart disease.

Therefore, research indicates that small amounts of chocolate can indeed offer heart health benefits.

The main flavonoids present in cocoa have been shown to relax blood vessels and lower blood pressure (Stresing 2004).

Choose the best topic sentence for the following group of supporting sentences.

This belief is especially common among athletes such as weight lifters who often consume large quantities of high protein foods and dietary supplements, thinking it will improve their athletic performance. Like weightlifters, football players consume too much protein, expecting it to produce additional muscle energy. Although it is true that muscles contain more protein than other tissues, there is no evidence that a high protein diet actually constructs more muscle tissue than a normal diet. Nutritionists point out that muscle cells grow not from excess protein but from exercise: when a muscle is used, it pulls in protein for its consumption. This is how a muscle grows and strengthens. If athletes want to increase their muscle mass and improve their performance, then they must exercise in addition to following a well-balanced, normal diet.

Select one:

- a. Many athletes have false ideas regarding proper nutrition.
- b. The public is often confused by the seemingly conflicting advice nutritionists give us about our health.
- c. Many athletes falsely believe that protein improves athletic performance by increasing muscle mass.
- d. My brother, a weightlifter, is an example of someone who consumes a lot of protein because he thinks it will make him bulky.

Choose the best topic sentence for the following group of supporting sentences.

Actually, the US stars are the creation of the public, its reigning favorites. Their influence in the fields of public behavior, values and fashion has been enormous. "The social history of a nation can be written in terms of its film stars," Raymond Durgnat has observed. Stars confer instant consequence to any film they appear in. Their fees have staggered the public. In the 1920s, Mary Pickford and Charles Chaplin were the two highest paid employees in the world. Contemporary stars such as Julia Roberts and Tom Cruise command salaries of many millions per film, and they have been so popular box-office giants. Some stars had careers that spanned five decades: Bette Davis and John Wayne, to name just two.

Select one:

- a. The star system has been the backbone of the American film industry since the mid 1910s.
- b. Producing films costs immensely for producers.
- c. Income of the American stars mostly depend on the quality of movies that they select.
- d. Many American celebrities around the world earn a lot in their career in the film industry.

Flag question

Choose the best topic sentence for the following group of supporting sentences.

Lately parents and critics across the country have been making a bigger fuss about the number and content of commercials aimed at children, and it seems as though the media has become a scapegoat for adults who have set questionable health guidelines for their children. It is both logical and factual to state that parents are the number one authority for most everything in their child's life, which of course includes food choices. Recent studies from the Institute of Medicine found that the easiest and most reliable measure of understanding a child's health and diet is to look at the health and diet of the parents. It is very likely that a child's obesity did not come from the media, but from behaviors within the family. Even if advertisements became restricted or more limited, if parents do not enforce healthy diets or teach nutrition, the children will have learned nothing. Timothy J. Muris of The Wall Street Journal realizes that without addressing the issues of parental control, the ban on child food advertisements are "appealing on the surface, but ultimately useless."

Select one:

- a. The staggering figures regarding childhood obesity alone are alarming enough to generate a stir.
- b.

According to Andrew Martin of the Chicago Tribune, "...the rates of obesity among 6 to 11-year-olds more than tripling during the last three decades, doubling for children ages 2 to 5 and increasing even more for adolescents 12 to 19 years old."

- c. Despite increasing rates of childhood obesity, we should not ban junk food ads aimed at children.

d.

Although junk food advertisements are being blamed for children's poor dietary habits, regulating these ads would not address the real source of the problem: lack of parental guidance.
